Cool Delights

Gala Days, Sporting Events, Fundraisers, Parties, and every event in between.

Contact Peter on 0425 899 623 or email terri@cooldelights.com.au for an obligation free quote, and experience the coldest ice cream in the world.

Fun Fact: Mini Melts are cryogenically frozen which means it is frozen with liquid nitrogen – totally inert and tasteless – to a very, very low temperature, minus 190 degrees (-190C) in fact so all the flavours are locked in instantly. Then, when these exciting shapes of ice cream are served to you they come out of a -40C degree freezer. Then, they simply melt in your mouth. Yummy!
