NSW Office of Sport Physical Activity Strategy

The NSW Department of Education is currently working with the NSW Office of Sport as part of the NSW Physical Activity Strategy Deep Dive process. This involves a series of meetings with a range of stakeholders and key partners from across education and other sectors to assess the current climate and future potential for improving participation in physical activity across the life stages. A report will be produced following this collaboration, which will be key to informing strategic direction and planning post consultations with sectors such as planning and infrastructure, health, transport, community-based programs, workplaces and sport and recreation.

ACHPER K-6 Sport and Physical Activity Conference

On the Monday 18 November, the School Sport Unit worked with ACHPER to present workshops to teachers from across the Wollongong area. These workshops involved a collaboration with the K-6 PDHPE Curriculum Support Team to highlight sport leadership and student ambassador opportunities in sport and physical activity. Also to further educate teachers in the application of the SAAFE principles and CHANGE IT strategy into Sport and PE lessons. This was a fantastic day, which saw 90 teachers in attendance. This day also highlighted the commitment that NSW teachers continue to make towards building their knowledge and skills to facilitate a range of physical activities in their respective school communities.
